Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 1652

Applicant requested a suspension of action on this application for three months under 37 CFR 1.103(a) on 6/4/01 and the application was actually suspended on 9/11/01. Since that time has now elapsed an action is being done on the application.

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/4/01 has been entered.

A PTO-948 noting problems with the drawings was mailed with the action of 12/5/00, Paper No. 8. Since applicants can no longer ask that drawing corrections be held in abeyance, corrected drawings must be submitted with the answer to this action.

Claim 5 is rejected under 35 U.S.C. § 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 5 claims retention of >90% activity under certain conditions at 25° C and <90% activity at 30° C. There is apparently no teaching of the activity of the enzyme under these conditions in the instant specification. Therefore one of ordinary skill in the art could not use the invention according to the limitations in the instant claim. This rejection is repeated for the reasons given in the last action. Applicants arguments have been

Art Unit: 1652

carefully considered but do not overcome the instant rejection. Applicants argue that the claim is enabled and "clearly has activity" because it depends upon claim 1 and "retains activity under the conditions specified in the claim and described in the specification at page 5". The examiner has examined page 5 of the specification and does not find any mention of these conditions.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-7 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Mitsugi, et al. (A) or Boyer, et al. (B or C). Applicants re-state the rejection except for leaving out reference to Boyer, et al. (C) and state that they have filed a request to suspend the application. The two month period for the suspension has long since expired without any further reply from applicants.

Art Unit: 1652

Claims 8 and 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mitsugi, et al. (A) or Boyer, et al. (B or C). This rejection has not been separately argued from the 35 U.S.C. 102(b) rejection, which has been addressed *infra*.

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
